

Now you can keep it all

In the past you had to buy a computer. Then a new model came out and you had to buy another. And another.

No Longer.

lets you escape the upgrade cycle.

XaStore. The new online service where you can store all of you files. Music files. Video Files. Work Files.

Files from you MP3 player or iPod. Files from your PVR (personal video recorder) or HTPC (home theatre PC). Files from your laptop or desktop computer.

Personal Files or Business Files. Small or large.

Existing files can be converted to XaStore's format or new files created. Your choice.

XaStore can store them all.

is secure

Only you can access your files. XaStore security is hackerproof. Not even the Government can say that about their ordinary systems.

XaStore security is up to date at all times. You pay for a service and we deliver.

is inexpensive

There are no big budget costs up front. No hardware to buy.

Just a small membership fee upfront and a small fee per page.

XaStore costs less than the electricity cost of running your own computer. Next to nothing.

is flexible

Add-on snap-in packs for new functions

Securities Manager through IP2Asset. Trade shares to make money.

Money Transfers through ETI. No risk from online banking thanks to XaStore.

does it all for you

XaStore protects your data.

XaStore manages your files, so there is no risk of losing them.

XaStore always has extra space available so you never need buy more space again.
