

Now you can have it all

Is this you?

Do you have stacks of DVDs piled around your home?

Do you have so much downloaded music that you can't fit it on a computer anymore?

Is your PVR (Personal Video Recorder) or HTPC (Home Theatre Personal Computer) always full?

Would you like to keep it all?

XaStore has storage technology that can grow with your needs. Just start with a single node and add on capacity as you fill it up.

Just put an XaStore node on your wireless or wired network and enjoy the freedom of unrestricted storage

Save money and hassle

XaStore provides all you need and no more. No paying for functions that you'll never need

XaStore brings hot-swap to the home. If you want to add on extra disks for more storage, just plug them in without having to turn off your XaStore system. Simple as that.

Protect yourself against outsiders

You never know when somebody will try to hack into your system

XaStore secure technology to provide easy security. Passwords can be set from any computer attached to you network.
