

Zeroth Handheld

The Zeroth **Handheld** operates independently of other equipment. The **Handheld** is styled like a tablet to minimise space and weight. A touch screen is installed for easy operation, with operations selecting graphically displayed options with the touch of a finger. It is powered by batteries, allowing operation independent of power sources for up to four days of normal use.

The Handheld reports displays map data and text communications on the screen. Audio can be played through bluetooth headsets, to eliminate the chances of the operator being overheard by hostiles. The **Handheld** has a USB host port to allow a range external devices to attached as required for specific purposes.

Specifications

Display:	640x400 touch screen LCD
Communications:	802.11b/g Wi-Fi Quad-band 850/900/1800/1900 MHz GPRS GSM Bluetooth
Connectivity:	USB Host Controller
Options:	GPS module
Weight	1kg (2.2 lbs)
Power:	Rechargeable internal battery with 4 days use per average charge
